Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

In response to applicant's pre-amendment dated Nov 23, 2004. The following action is taken:

Please amend the dependency of claim 5.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 12-17 and 19-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Publication of Registered Utility Model Application number 3057875. The independent claims merely read on optimizing the writing laser power based on a test recording on the disk. Test recording to optimize data recording is well established in the art. The reference shows the use of a test recording on a disk S1, calculating a first characteristics value B S2, generating a second characteristics value based on a modulation rule S5 in order to optimize the laser output S6.

With respect to the limitations of claims 15-17. See the illustrated flowchart showing the value B.

Claims 1-11 are allowed.

Art Unit: 2655

None of the cited prior art shows or teaches determining the preferred value of a recording velocity based on the first and second generated characteristics as claimed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 5862103; 6639890 and 6157609.

Any inquiry concerning this communication should be directed to NABIL Z HINDI at telephone number (703) 308-1555.
